

Introducing

“SITE MARKOUT SURVEYS”

The entry level survey solution

Presented by Mr. David Pitt

June 2007

No excuse for accidents

- A clear indication of underground hazards
- Provides compliance with HSG47 H&S Legislation
- Enhances Site Safety
- Non-invasive methods
- Low cost with hourly, and part day rates available
- Clear colour coded surface markings

Eliminate the risks

- Suitable for smaller schemes
- Ensure safety even when the level of risk is believed to be low
- Also suitable for companies with in-house land surveying facilities

Services to meet all requirements

- Electromagnetic surveys using RD4000 T10 systems to locate cables or metal pipes
- Plastic or Fibre Optic services are traced using Ground Penetrating Radar

The need for expertise

- You could do it yourselves however
- Expertise gained over many years enables us to provide you with reliable information even in the most complicated locations

Optional Mapping Services

- Robotic Total Stations and GPS systems are available to record site markings and topographic detail if required
- CAD Drawings can also be produced to provide a permanent survey record
